Isolation，fixed voltage input，unregulated positive and negative dual outputs SMD package

FEATURES

- International standard SMD encapsulation
- Isolation voltage 1500 VDC
- Sustainable short-circuit protection
- Low no-load input current
- Conversion efficiency up to 85%
- Working temperature range:- 40~+105°C

3YR Warranty RoHS

D1-A_XT series is an international standard straight-through SMD package, primarily used in pure digital circuits, low-frequency analog circuits, relay drive circuits, data exchange circuits, etc

Design reference

1. General typical application circuits (as shown in the following figure)

If further reduction of input and output ripple is required, a filtering network can be connected at the input and output terminals, as shown in Figure 2. Choose a suitable filtering capacitor. If the capacitor is too large, it may cause startup problems. Under the condition of ensuring safe and reliable operation, the reference capacitance value is recommended in the table on the right. For applications with actual output power less than 0.5W, it is recommended not to connect external capacitors.
